

ENVIRONMENTAL POLICY

Go Virtual Nordic AB is the company that focuses on the environment through a constant ongoing collaboration with our suppliers to reduce the environmental impact. Shorter transport and low emission values are some of the things we do on the way to a better environment. The company strives to have the knowledge and the will required to adapt to customers' and society's demands for ecological sustainability and the least possible negative environmental impact.

We will work on the following guidelines to minimize our environmental impact

- When choosing vehicles and other production aids, as well as service and maintenance products, the most environmentally friendly alternative should be selected where economically reasonable.
- Waste and residual products from the business must be handled in accordance with our work routines.
- We must place the same demands on our suppliers and customers as on ourselves in the environmental work.
- All employees must have a basic environmental education and a basic knowledge of our crucial environmental aspects.
- Our goal is to be one step ahead of the authorities' requirements and legislation in the environmental area in the direction of operations.
- We will continuously update the grading of our crucial environmental aspects.
- We will establish short- and long-term goals and then establish an action plan to achieve these goals and improve environmental work and environmental impact.
- At all levels of the company, we will work with continuous improvement in environmental work and continuously report the results at the management's review.
